

VARIEXL IMAGE

1200x1200 ~ 3840x2160+

MODEL: VarieXL (custom privé non-public)

TRAINING: Nov 2023 ~ Jan 2024

MODES: Admin / sfw / nsfw

RESOLUTION: 1200x1200 à 3840x2160 + Pano

Welcome! Bienvenue!

Ce document expliquera et célébrera les merveilleux pouvoirs de conception de notre nouveau modèle d'imagerie. VarieXL est un modèle personnalisé basé sur l'infrastructure brute de SDXL. Durant l'entraînement, nous avons permis des dimensions inhabituelles, créant ainsi quelque chose qui rompt le format standard traditionnel de 1024x1024 pixels et nous permet de générer des œuvres d'art uniques à des tailles natives massives!

This document will explain and celebrate some wonderful design powers of our new imaging model. VarieXL is a custom trained model based on the raw SDXL infrastructure. In training we allowed for odd sizing and thus created something that breaks the traditional 1024x1024 standard formatting and allows us to generate unique art at massive native sizes!

Comme notre objectif principal est d'amener le numérique au physique en utilisant tous les types de médias artistiques, cela nécessite en retour des résolutions d'image beaucoup plus élevées que ce que la plupart des IA peuvent produire. Tous sont configurés pour des sorties 72ppp (un sale secret dont personne ne parle vraiment), ce qui rend 99 % uniquement adaptés à la visualisation sur écran. La transformation du numérique en physique nécessite pour commencer des images de plus grande taille, et de grande qualité, pour être converties en 150 ou 300ppp en fonction du média artistique utilisé et de sa distance de visualisation.

As our principal goal is to bring digital to physical using all types of arts media, that in return requires much higher image resolutions than what most ai can produce. All are configured for 72dpi outputs (a dirty secret nobody really talks about) making 99% only suitable for screen viewing. Turning digital into physical requires larger sized images to begin with, in great quality no less, for conversion into 150 or 300dpi depending on the arts media used and its viewing distance.

Le tableau ci-dessous répertoriera les échantillons d'images et les informations intégrées à chaque image. Vous pouvez glisser l'image dans différents onglets d'informations PNG de différentes interfaces graphiques de stable diffusion, comme le auto1111 si vous souhaitez récupérer l'invite et les paramètres pour les essayer sur vos propres modèles publics.

The table below will list the image samples and prompt info embedded into each image. You may drag the image into various PNG info tabs of different Stable Diffusion gui interfaces for the details, such as auto1111 if you wish to recover the prompt and settings to try on your own public models.

La conversion ascendante sera décrite dans le tableau ci-dessous et lors de nos tests, nous avons constaté que seuls deux algorithmes de conversion ascendante prennent en charge les supports physiques, et nous utiliserons uniquement les algorithmes 4x_foolhardy_Remacri et LDSR en fonction des besoins. Le LDSR réalise essentiellement une conversion ascendante avec un ratio de pixels presque parfait 1:1, ce qui prend beaucoup plus de temps mais n'apporte aucune altération à l'image d'origine. Foolhardy, en revanche, est nettement plus rapide lors de la conversion ascendante, mais en retour, il modifie légèrement la teinte et la saturation de l'image d'origine, le rendant plus adapté aux images artistiques. Les deux conservent les détails et la décision appartiendra aux clients en fonction de leurs besoins d'impression.

Upscaling will be described in the table below and in testing we found that only two upscalers are supportive of physical mediums and only 4x_foolhardy_Remacri and LDSR upscalers will be used depending on the requirements. The LDSR essentially upscales at a near as makes no difference perfect 1:1 pixel ratio which takes much longer but gives zero alterations to the original image. Foolhardy however is vastly faster when upscaling but in return slightly alters the hue and saturation from the original, making it more suitable for artistic images. Both keep details so the decision will be up to the clients based on print needs.

Les images d'échantillon contenues dans ce document peuvent être téléchargées directement de notre site www.Varie.ca
REMARQUE : Pour la sécurité de tous, nous utilisons un service de fichiers cryptés (filen.io) pour partager nos échantillons.

The sample images contained within this document can be found directly for download on our website www.Varie.ca
NOTE: For everyone's security we use an encrypted file service (filen.io) to share our samples.

Les images d'échantillon PEUVENT être utilisées AVEC CRÉDIT à Varie.ca sur n'importe quel blog, article, actualité, émission de télévision ou divers supports à des fins d'affichage uniquement dans l'article (votre article). Aucun gain commercial ne peut être obtenu de quelque manière que ce soit à partir de nos échantillons téléchargeables à aucun moment.

The sample images MAY be used WITH CREDIT to Varie.ca on any blog, article, news, tv or various mediums for display purposes only within the(your) article. No commercial gain may be obtained in any way, shape or form from any of our downloadable samples at any point in time.

VOUS POUVEZ imprimer sur n'importe quel média artistique, à des fins d'affichage personnel, uniquement dans votre domicile (non commercial)! N'oubliez pas de convertir les échantillons à 72ppp en 150/300ppp selon les besoins, notez que tout graphiste ou imprimeur pourra vous aider à cet égard.

YOU MAY print to any arts media, for personal display, only in your home (non-commerce)! Please remember to convert the 72dpi samples into 150/300dpi as needed, note that any graphic designer or print shop will be able to help you with that.

Veuillez profiter de manière responsable. =)

Please enjoy responsibly!

Note: All ai outputs, be it image, text, audio, anything! requires post-processing before using in an official format. These images are for demonstration of our general artistic model and were not edited in any way to preserve the original embedded data. The proof-of-concept stamp essentially, they're not perfect on purpose!

Note: Toutes les sorties d'IA, qu'il s'agisse d'image, de texte, d'audio, de n'importe quoi! nécessite un post-traitement avant d'être utilisé dans un format officiel. Ces images sont destinées à la démonstration de notre modèle artistique général et n'ont en aucun cas été modifiées pour préserver les données intégrées d'origine.

Le tampon de preuve de concept essentiellement, Ce n'est pas pour rien qu'ils ne sont pas parfaits!
